Professional Experience

Brad Atkin is a Shareholder at Doeren Mayhew, where he is the Practice Leader of the firm's IT Advisory and Security Group.

With nearly 15 years of experience, Brad works closely with a diverse sector of clients to ensure compliance, identify threats and protect critical data. Through the firm's tiered cybersecurity solution CYBERCLAW™, he performs risk assessments, vulnerability assessments, policy and procedure reviews, phishing exercises and much more to provide a holistic view of clients' cyber environments. Brad's background also includes IT audits, IT strategy development, IT compliance assessments, and System and Organization Controls (SOC) reporting.

Broadening Brad's experience and perspective, is his many years spent providing clients with financial audit services, including ensuring effective use of accounting and auditing practices, internal controls and system management processes.

Brad's industry experience includes the financial institutions, technology, construction, manufacturing, service provider, leasing and retail sectors.
